QUALITY AND SAFETY FIRST AT MOOG®

Chassis components play a vital role in keeping vehicles stable, ensuring predictable handling and safe operation throughout a vehicle's lifetime. Today, the majority of commercial vehicles in Europe weigh over 16 tonnes (and some as much as 30 tonnes), so the loads and stresses that a truck's chassis must cope with are huge. Because we understand this, all MOOG® parts meet or exceed OE quality standards and undergo rigorous testing to ensure that they offer the highest quality and reliability.

PRODUCT IS KEY

MOOG parts are designed, produced and tested to withstand extreme situations. Our engineers use the original equipment as the master to develop all MOOG products. The metallurgy and geometry of every original part is identified, measured and improved whenever possible. Next, every product is subjected to extensive testing to ensure optimal performance and maximum durability.

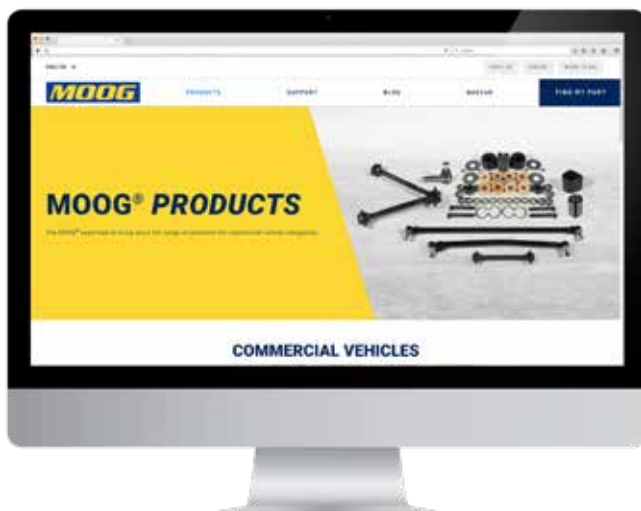

EASY TO INSTALL

With over 1.000 references, MOOG offers an extensive range of Steering & Suspension parts for trucks and busses. We keep in touch with market needs through continuous new product introductions. Every single MOOG part comes with all the necessary hardware and accessories. In addition, repair kits and pre-assembled parts are also available to ensure a perfect and hassle-free installation.
